HAWAII

hameha I, the founder of the monarchy, valued at \$150,000 which was used as a mantle of state by the sovereigns. It was made of yellow feathers from the "mamo" bird, each bird furnishing only two small tufts of feathers for it, one from under each wing. It is four feet long and has a spread at the bottom of 11½ feet. Nine generations were employed in making it.

Honolulu is well laid out in American fashion. Since the island is volcanic the streets are macadamized with coral and lava, making good drainage for the 40 to 60 inches of annual rainfall. The city has nearly 200 acres of public parks, which, including the homes and street borders are luxuriantly covered with beautiful trees, plants and flowers. The aquarium is in Kapiolani Park. Open daily from 10 a.m. to 5 p.m.; Sundays, 2 p.m. to 5 p.m. Admission 25 cents. The Aquarium contains a remarkable collection of brightly colored and queerly shaped fishes.
